## Ayurvedic Medicine Can Cure Cancer

JAIPUR, Feb. 26— A herbal formulation has been proved "very successful" in treating cancer, claims an Ayurvedic Vaidya.

The herbal formulation starts

showing results within two months and cures the cancer patient completely in two years", asserts Sri N.L. Tiwari, who is administering this herbal formulation to cancer patients — mostly in terminal stages.

Sri Tiwari told PTI that his formulation, which he prepared from valuable information gathered from tribals in Assam forests during his research on herbs there, had proved effective in almost all types of cancer except liver.

He showed medical histories and records of several patients indicating disappearance of malignancy after oral administration of the herbal formulation.

Sri Tiwari, who makes his formulation himself, claimed that he was sending his medicine to patients in UK, USA, Germany and Canada.

Sri Tiwari feels that modern medical practitioners should take up research projects to understand how this formulation works in the body.

He has written to the Centre and State Governments to get the efficacy of his formulation tested by specialists in Government hospitals.

Sri Tiwari, who supplies the herbal medicine to most patients free of charge, said, "I do not want money, nor do I want to keep it secret". (PTI)

### Green Belt Scheme To Check Pollution

JAIPUR, Feb. 26— A green belt... around the world-famous Ghana Birds Sanctuary near Bharatpur may check the growing pollution menace.

A scheme to develop the green belt has been formulated, a seminar on "Wasteland Ecology and Management" has been told.

The District Collector, Sri G.S. Sandhu, told environmentalists attending the seminar at Ghana that arrangements for additional water supply in the Keoladev National Park, inside the sanctuary, were also being made under another scheme.

The Secretary, Environment and Forest, Rajasthan, Sri Mahendra Singh, inaugurated the seminar being attended by about 75 experts from seven countries. —PTI
